

Cybersecurity Essentials:

Building and Managing Business Cybersecurity Programs

Skilled Technical Workforce Program
Recognized by the National Science Board

This course uses lectures, case studies, and practical exercises to provide the knowledge and understanding of the core concepts of Governance, Risk, and Compliance (GRC) and their role in organizations.

Participants learn the skills needed to design, build and implement a cybersecurity program:

- Identify and assess various types of risks and cyber threats
- Develop appropriate risk management strategies and systems
- Understand and develop a comprehensive compliance program
- Gain a solid foundation in cybersecurity principles and practices
- Analyze case studies and best practices in implementing GRC programs
- Evaluate and implement GRC tools and technologies to support organizational goals
- Build reports and dashboards that effectively communicate GRC results effectively to stakeholders

IMPACTFUL, STATE-OF-THE-ART TRAINING
